## Select Companies to add to Build-A-Report<sup>SM</sup>:

Click any statistics you want to include in the report. Click the **Select All** box to quickly select all statistics for inclusion. You can also click the **Clear All** check-box to start over. Scroll down to the **Add Company Profiles to Your Report** area.

### Add Company Profiles to Your Report

You will be taken to a Company Search page. You may click "View All Companies," or you may select criteria to narrow your search. From the Search Results, please put check marks by up to 10 companies that you want to appear in your Build-A-Report.

Do not include companies

Company profiles selected: 4

Choose **Select Companies**. You will be taken to the company search page, which you can use to narrow your selection in any way that you'd like, or you can view all companies. When you reach the results page, you also have the option to further sort the companies by ordering them by one of the column headings, i.e. company, Symbol, Industry, Employees, Rev14, Rev13, City, State, Country or NAICS. Clicking on any of these headings once puts the results in ascending order for that category. A second click reverses the order. After you have searched for and sorted your companies, you are ready to make your selection. Each company will have a check box next to the name to allow you to do so. Up to 10 companies can be included in your Build-a-Report. Once you select the companies you wish to include, click the blue Continue button above the results list. This will take you back to the Build-a-Report page.
